

## VIDEO WALL

Panel: from 42 to 55inch or above LG/SAMSUNG/AUO industrial panel

### **Main features:**

Branded LG/SAMSUNG/AUO industrial panel, supports 24 hours continuously playing  
Full hardware structure, no CPU and operating system  
Easy installation, only fix them together by metal bracket  
Easy to operating, can operate system together with software flexible, we offer free software  
Supports RS-232 serial ports remote control  
Supports multiple signal input: BNC, YPbPr, VGA, HDMI, DVI and RS232  
Images are displayed smoothly and naturally without time delay and tailing and image quality is quite smooth  
Supports 10 x 10 pieces panels splice  
Easy maintenance, if one unit is going bad, only replace it with a new one  
Wireless control: common solution  
The PC needs to connect LCD video wall with RS232 cable  
And distance should be within 10m  
The longer the cable, the weaker the signal  
Now wireless control no need to worry about how to hide the cable between the PC and the distance is within Wi-Fi range  
The new solution also supports multiple PCs to control LCD video wall  
Supports multiple user management  
Comes with 2xDVI inputs and supports two full HD signals at the same time. The common solution with one DVI input only, it requires a PC of matrix if two DVI inputs needed for the project, then the cost will increased  
Supports setup screen timer and memory function after cutting off power  
Scene management: users can save and preset the scene that want to display and can setup the scene interval in turn time  
Accessories: RS232 convertor, RJ45 convertor, VGA cable, RJ45 cable, power cable, remote controller and software
